METRO CALL 511

CHALLENGES

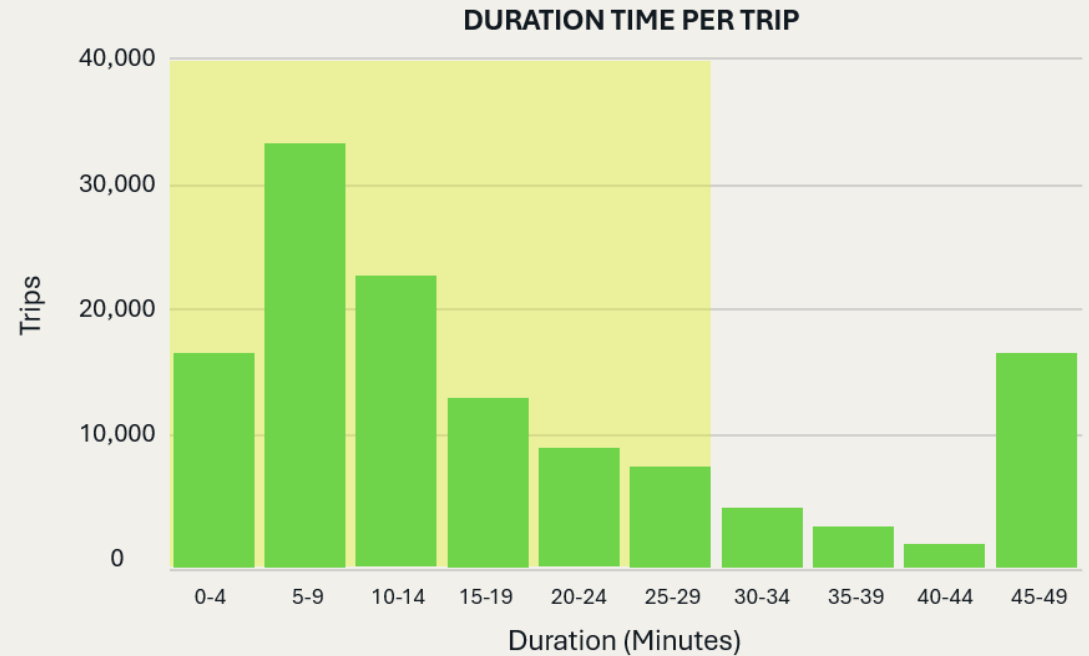

DECLINING VOLUME

The number of trips peaked at 285,000 in 2018 but there has since been a consistent negative trend as trips have dropped significantly to 150,000 in 2021.

AVERAGE DURATION

Most trips are within the 30-minute window allotted for each trip purchase without penalty (trips after 30 min incur additional fees). Staying in this window means less opportunity to generate revenue on trips that are 30+ minutes long.

INACTIVE STATIONS

The number of active stations surpass that of inactive stations, but there is still a significant number of inactive stations.

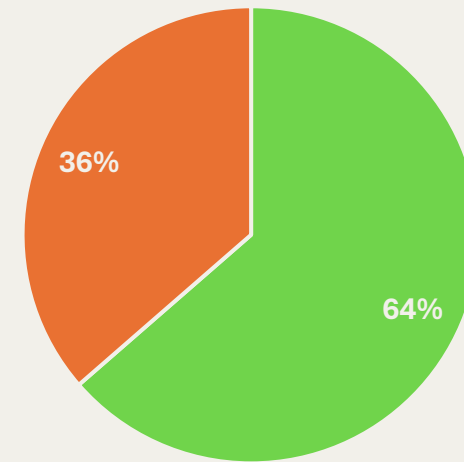

217 Active Stations

124 Inactive Stations

NUMBER OF ACTIVE and INACTIVE STATIONS

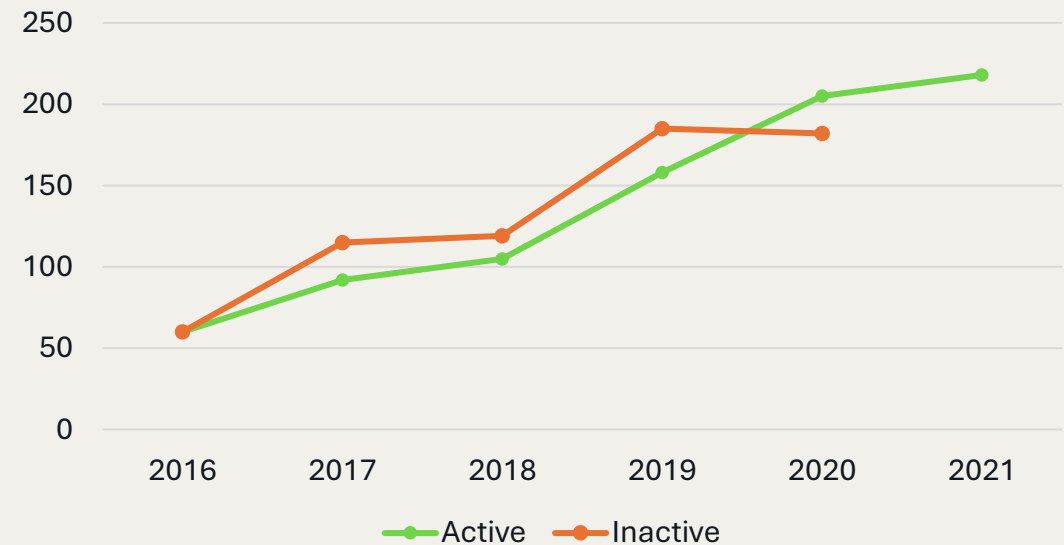

■ Active Stations ■ Inactive Stations

INACTIVE STATIONS (CONT.)

The lack of consistency regarding active/inactive stations can deter customers from using Metro Bike Share as they may feel as if they cannot depend on regular availability in their area.

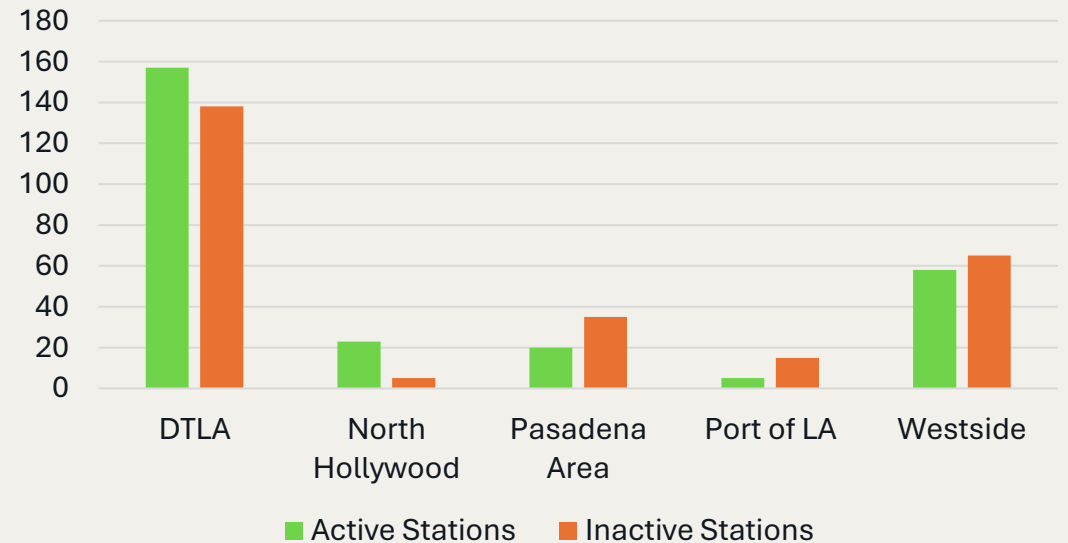

NUMBER OF ACTIVE/INACTIVE STATIONS OVER THE YEARS

ACCESSIBILITY

Most stations, active or inactive, are concentrated in the downtown LA area, which limits accessibility and commuting potential.

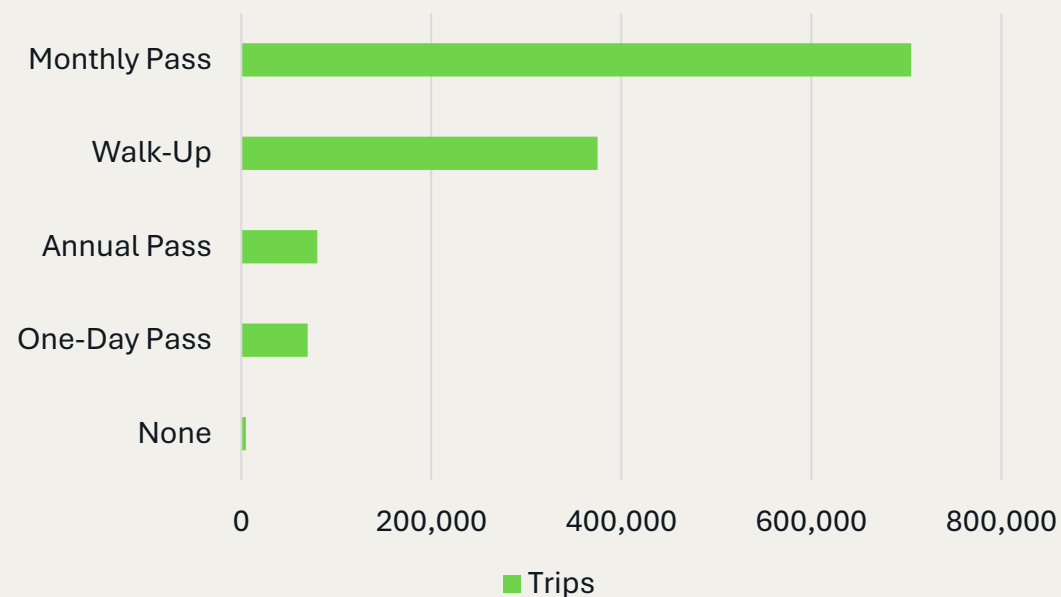

NUMBER OF ACTIVE AND INACTIVE STATIONS BY AREA

PASS TYPES

Monthly passes are being sold more than any other pass types even though buying an annual pass would be more economically feasible for the customer. Why aren't people buying annual passes?

PASSHOLDER TYPE BY TRIPS

PASS TYPES (CONT.)

Fear of long-term commitment on an annual pass is a possible reasoning of short-term pass purchases.

Factors that can contribute to this fear may include:

Job security

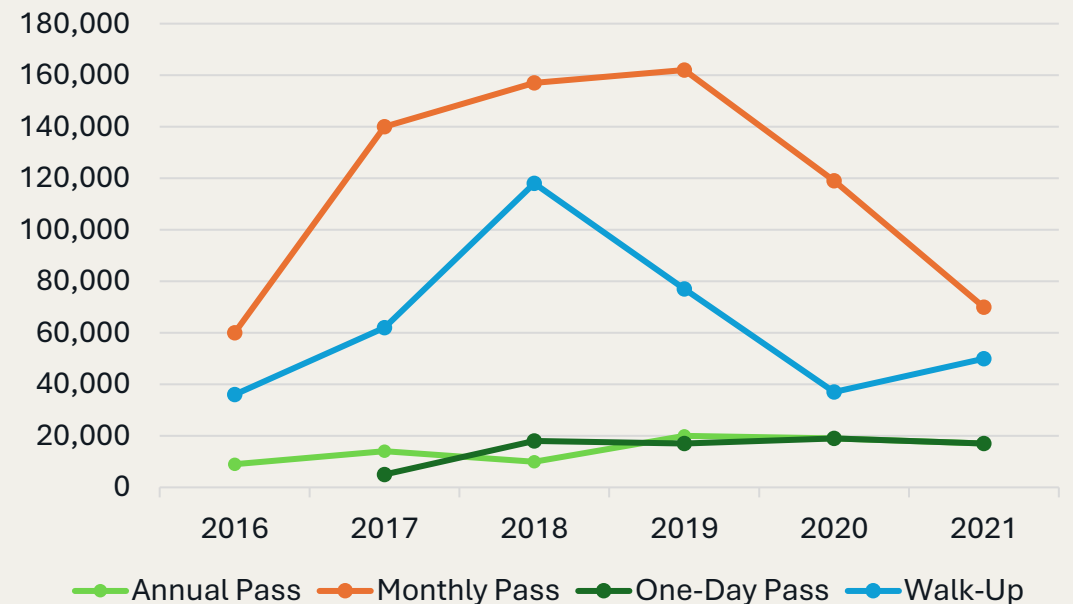

Fluctuation in exercise activity

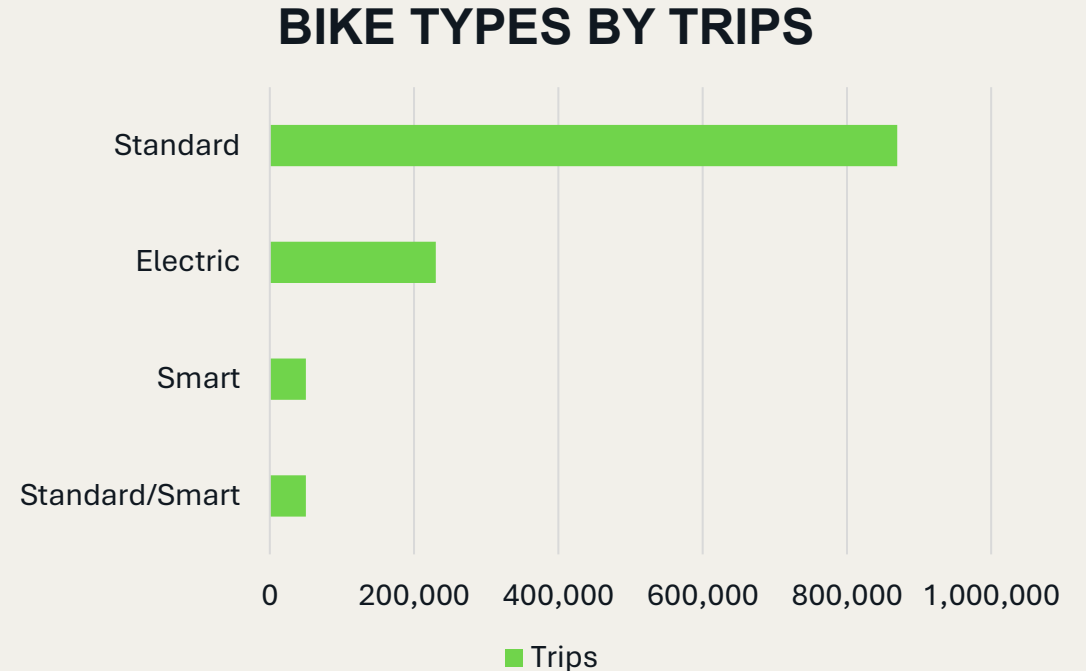

Temporary living situations

NUMBER OF TRIPS BY PASS TYPE

BIKE TYPES

Standard bikes are the most popular bike option, but they aren't built for long commutes. This could be due to the quantity and availability of standard bikes.

A grayscale photograph of a woman with dreadlocks wearing a black helmet and a shoulder bag, looking down at a smartphone. She is standing in a row of parked bicycles. The background shows a city street with buildings and a decorative wall. A bright yellow rectangular box is superimposed over the center of the image, containing the word 'SOLUTIONS' in bold black capital letters.

SOLUTIONS

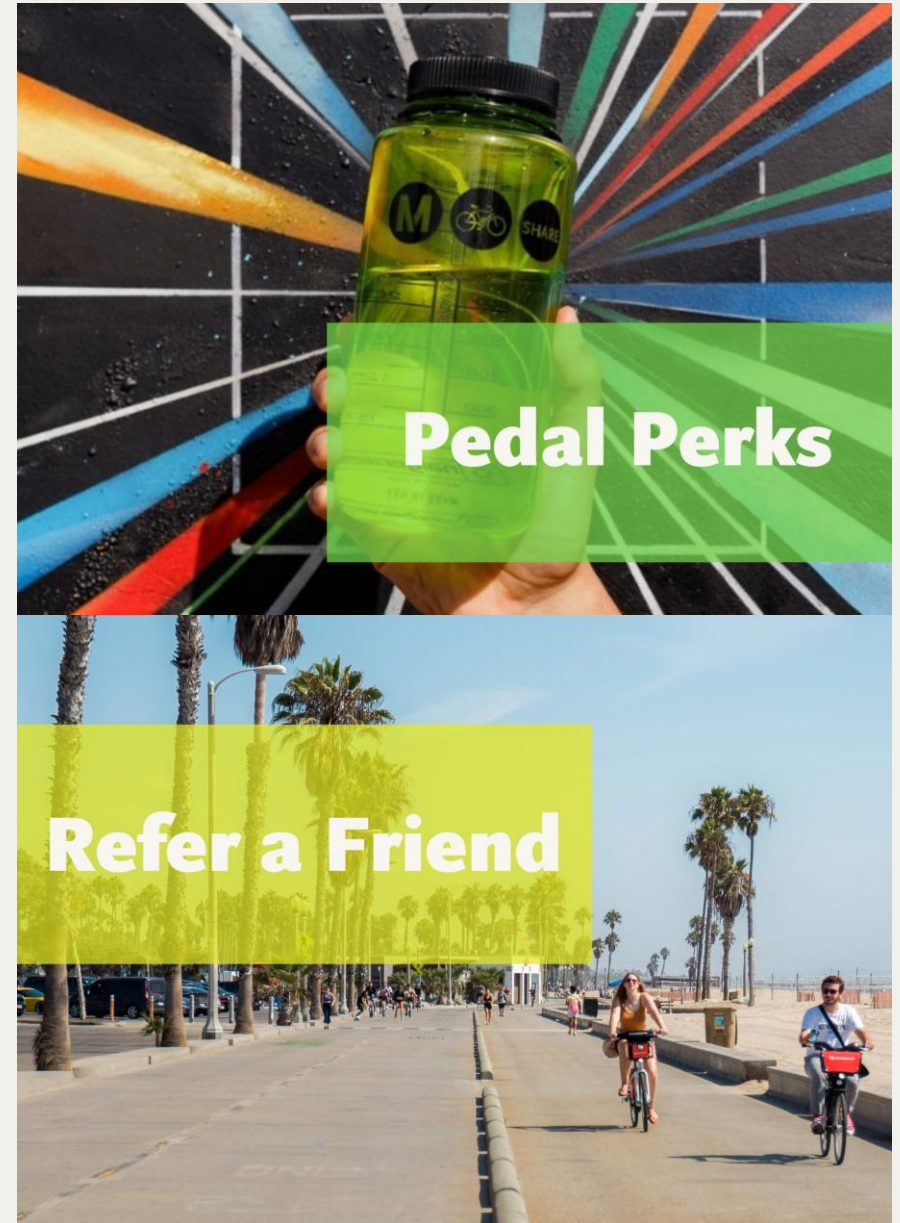

NEW PASS TYPES

Implementing weekly, quarterly, or even 6-month pass types could incentivize customers to purchase a pass more custom to their needs.

1-Ride	24-Hour Access
\$1.75/30 Minutes	\$5 to Start
All rides are \$1.75 every 30 minutes	All rides 30 minutes or less are free.
Purchase at any station, online or in the mobile app.	\$1.75 per 30 minutes thereafter.
Sign Up	Sign Up
30-Day Pass	365-Day Pass
\$17/month	\$150/year
All rides 30 minutes or less are free.	All rides 30 minutes or less are free.
\$1.75 per 30 minutes thereafter.	\$1.75 per 30 minutes thereafter.
Sign Up	Sign Up

NEW REWARDS

Besides “Pedal Perks” and “Refer a Friend” program incentives, what about adding a program that promotes healthy living and exercising for durations longer than 30 minutes?

INCENTIVES FOR BUSINESSES

Extending pass options beyond a yearly membership for business to include different time spans at a discounted rate (weekly, monthly, etc).

365-Day Pass

\$89 per year

All the benefits of our 365-Day Pass

\$89 per employee (over 40% savings)

Employees pay for all trips over 30 minutes

STATION CONSISTENCY

Creating a solid criteria for what warrants a Metro Bike Share station and maintaining that station can create consistency and customer dependability.

EXPANDING COVERAGE AREA

Expanding the coverage area will allow flexibility in travel, a larger network, longer commutes, more accessibility, and more exposure.

NEW BIKE TYPE

Introduce a new bike type that is built for longer commutes and/or exercising. This can create new interest by gaining a new customer base while promoting a healthier lifestyle.

A grayscale photograph of a person from behind, holding a white helmet with both hands. The helmet has two circular eye-like cutouts and a small rectangular sticker on the front. The sticker contains three icons: a circle with the letter 'M', a bicycle icon, and a circle with the word 'SHARE'. A bright yellow rectangular box is superimposed over the lower part of the helmet, containing the word 'CONCLUSION' in bold black capital letters. The person is wearing a light-colored long-sleeved shirt and a watch on their left wrist. The background is a blurred outdoor setting with trees and a fence.

CONCLUSION

SUMMARY

After analyzing the data for insights, we were able to get an idea of where some of our weakness's lie, and generate possible solutions based on the data.

Create guidelines for bike stations to maintain station stability, consistency, and dependability.

New pass types and rewards incentives to potentially increase interest.

New bike types built for longer distances to encourage longer durations of usage.

Expand to create flexibility in travel, a larger network, longer commutes, more accessibility, and more exposure.

A grayscale photograph of four delivery riders on Doordash e-bikes. The riders are wearing helmets and are positioned in a line on a paved path. To their left is a dense wall of ivy, and to their right is a tall chain-link fence. The background shows a clear sky and distant trees. A bright yellow rectangular banner is superimposed over the center of the image, containing the text 'FUTURE RESEARCH' in bold, black, sans-serif capital letters.

FUTURE RESEARCH

FUTURE RESEARCH

To implement the suggested solutions more research and data would need to be considered such as:

Storage necessities

Cost of new bikes (including maintenance costs)

Risk assessment of potential profit vs investment

Demographic datasets

Surveys

Case studies

Inventory assessment
